To: Green Homes Australia Builders

Product Partner – Haymes Paints

Constructive Energy (Green Homes Australia - Affiliate Partner) is happy to introduce you to our product partner **Haymes Paint** offer for their *Ultra-Premium Specification* (3 coat system) product range.

Haymes have invested considerable time and effort into developing paint systems that produce a long lasting, high quality finish. As part of Haymes offering to Builders they have specified a paint system that will deliver the paint finish that you and the customer will be proud of.

To order the paint the builder is to inform new painting contractors to contact the Haymes Business Manager to receive the correct painting specifications and the contracted prices that have been allocated to the builders projects. After this the Haymes Business Manager will ensure the appropriate builder prompts are setup for the builders contracted painter on the stores ordering system.

The contracted painter is to provide the store with the:

- Customer Account Code (Code - GHAL)
- Builder Group (Example – GHA – Albury)
- Builder Order Number and/or Site Address

Note: if no Builder Order Number or Site Address is provided, the contracted prices will not be allowed.

- The correct information will provide the painter with the contracted prices
- Painter will receive both a Tax Invoice and a New Home Job Form
- The New Home Job Form should be provided to the builder for verification that Haymes was used.
- The New Home Job Form is also kept as a reference for future ordering.

Attached you will find the following documents

- GHA Builder Specification
- Compliance Document
- Haymes Low VOC Booklet
- Haymes Builders Support

Regards

Ashley Bland
